PROJECTS & EXTRACURRICULAR

Portfolio: https://dintwe-i.github.io/WEBDEV_PORTFOLIO/

BOIKHUTSO MINING | FULL WORDPRESS WEBSITE BUILD

- **Technologies:** WordPress, Elementor, Responsive Design

- Designed and developed a complete corporate WordPress website from the ground up using Elementor.
- Built and structured service pages, company information pages, and enquiry pathways.
- Managed content layout, page formatting, and responsive presentation across devices.
- Configured hosting, domain setup, and deployment for production launch.
- Ensured maintainable site architecture and user-friendly content organization.

OMNI SECURE | WEBSITE MAINTENANCE & CONTENT IMPROVEMENTS

- **Technologies:** WordPress, Responsive UI, Website Support
- Contributed to ongoing website updates and page improvements.
- Implemented content and layout refinements to improve usability and presentation.
- Performed routine website maintenance and troubleshooting.
- Supported domain, email, and website-related technical administration.
- Worked collaboratively to maintain a professional and consistent online presence.

WIDEVIEW PROPERTY | WORDPRESS WEBSITE REVAMP

- **Technologies:** WordPress, Divi Builder, Responsive Design
- Revamped existing WordPress pages using the Divi theme builder.
- Improved page structure, content hierarchy, and visual consistency.
- Optimized layouts for desktop, tablet, and mobile responsiveness.
- Assisted with ongoing website maintenance and performance-focused improvements.
- Enhanced accessibility to service information through clearer content presentation.

PROUDLYASSOCIATED | WEBSITE REVAMP & CONTENT MANAGEMENT

- **Technologies:** WordPress, Divi Builder, Content Publishing
- Updated and improved existing WordPress pages using Divi.
- Refined page hierarchy, content flow, and responsive layouts.
- Supported content publishing workflows and media updates.
- Conducted routine website reviews, maintenance, and backups.
- Ensured consistency with branding and company messaging.

In Progress: AI ADMIN/PA WORKFLOW

- Built with: n8n, OpenAI (GPT-4.1-mini), Notion API, Telegram Bot API, Google Workspace API, Slack API.
- An AI-powered administrative automation system that functions as a virtual operations manager. It processes structured commands via Telegram, drafts and responds to emails, generates internal documents, updates Notion databases, assigns tasks, logs decisions, and synchronizes team communications across Slack and Google Workspace.

- The workflow centralizes operational control, enforces structured record-keeping, and reduces manual admin workload through intelligent automation and contextual decision logic.
- Preview: **TBA**

- Contributor to web and open-source projects
- Interests: Cloud Architecture, App & Game development, Cybersecurity, UI/UX design.
